Profile Book

# Texture for Living.

Stone has a unique intricacy that is simply captivating. With such diversity in shape, color and texture it's easy to see why it can dramatically enhance any exterior or interior space.

Our commitment to craftsmanship can be seen within every textural detail, countless hours spent hand-chiseling each and every natural stone before it was carefully replicated through our proprietary mold techniques. At StoneCraft we honor the masonry traditions of the past and promise to deliver quality and affordability with every stone we make.

INDUSTRIES™

## Farmledge

In the early 1800's farmers would remove rocks from their land in preparation for crops and livestock, often stacking the stones into long walls to help divide properties. It was estimated around 1871 that over 250,000 miles of stone walls existed across New England and New York.

The irregular stone shapes, sizes and textures of Farmledge have been molded into stone panels to re-create the time honored look of stacked stone with the benefit of a simplified installation. Farmledge stone panels are approximately 4 1/8" high with varying lengths ranging from 7 3/4" - 19 3/4".

## Heritage

The warm and traditional appearance of Heritage lends itself to a wide variety of architectural styles adding elegance to any residential or commercial application. Each stone was originally hand-chiseled by masons to create rugged rectangular ashlar shapes. The profile installs into randomly coursed patterns making an impressive visual statement. Heritage stones range from 2¼"-8" in height and 3½"-17" in length.

# Fieldstone

With a wide range of bold angular shapes and rugged surface texture, Fieldstone creates a unique visual dialog. Inspired by rustic European building techniques, Fieldstone consists of intentionally irregular shapes and sizes. The profile ranges from 2"-18" in height and 4"-18" in length, with an average of 7"×9".

## Ledgestone

The linear lines of this versatile profile create an appealing contrast of rugged texture and contemporary design. Ledgestone ranges from approximately 1"-5" in height and 5"-21" in length. Installed in a dry-stack application the stones stack tightly together horizontally as the varying stone depths create intriguing shadow play.

## Top Rock

The rubble shaped stone indigenous to Pennsylvania features subtle contours and smoother rounded edges. The sandstone appearance with its low profile face allows light to emphasize the colors inherent within each stone. Top Rock ranges from 2"-20" in height and 5"-25" in length.

# Cobble

The sandstone textured profile Cobble is roughly chisel-cut into rectangular ashlar shapes. To soften the rugged appearance, the edges are slightly weather worn. Subtle face texture and unique beveling encourage the individuality of each stone. Cobble ranges in size from 2½"-12" in height and 4"-21" in length.

Because StoneCraft replicates natural stone, variations should, and can be expected. Even though colors in this brochure are as close to the actual stone as possible, photographic and printing techniques – and actual viewing conditions – can alter perception of color. It is recommended to obtain a sample of StoneCraft before placing an order.
